

KOMAL KATAL

Service Delivery Manager | Enterprise Operations | Program Governance | Customer Success
+91 7006703800 | komal2118katal@gmail.com | linkedin.com/in/komalkatal

PROFESSIONAL SUMMARY

Results-driven Enterprise Operations and Service Delivery leader with 13+ years of experience in SRE Governance, Program Management, and Strategic Account Management across complex, high-availability environments. Built a product support function from the ground up at Mastercard, mentoring three team members to collectively manage 80 white-label enterprise accounts across APAC, NA, and EU, delivering 90–93% CSAT and ~95% SLA adherence. Proven track record in driving Operational Resilience, Benefits Realization, and Customer Retention through structured PMO practices, RAID Management, and data-led service assurance. Brings deep, working fluency in AI-powered tools, using them daily to build processes that improve team efficiency and speed up decision-making in live service environments. Experienced in leading Digital Transformation initiatives and embedding Platform Operations governance across distributed, mission-critical environments. Strong Executive Reporting and Stakeholder Governance skills with the ability to influence at senior levels and drive Change Management across cross-functional organizations.

CORE COMPETENCIES

• SRE Governance & Service Reliability	• Process Simplification	• Service Level Agreement Management
• Approval Rate Optimization & Root-Cause Analysis	• Cross-Functional Program Execution	• ITIL-Based Governance
• Operational Resilience & Service Assurance	• Program Governance & PMO	• Customer Retention & Revenue Protection
• Enterprise Portfolio Management	• AI-Driven Workflow Automation	• Demand Management
• B2B & Corporate Sales	• Vendor Management	• Performance, Metrics & Analysis

PROFESSIONAL EXPERIENCE

Mastercard (CORE Payments)

Senior Service Delivery Manager, Global Payments (MPGS) | Pune, Maharashtra | 2023 - Present
Portfolio: 50+ Enterprise Customers | Regions: AP, EEMEA, NA, EU | Revenue: \$7–8 Mn annually

SRE Governance, Service Reliability & Operational Resilience

- Owned and grew a \$7–8 Mn global enterprise portfolio across 50+ merchants, driving retention, upsell, and cross-sell across Mastercard payment gateway, digital, and managed services products.
- Owned a quantified KPI scorecard and SRE governance framework, continuously optimising SLA performance, platform availability, and service responsiveness, achieving ~95% SLA adherence and 90% incident non-recurrence across enterprise operations.
- Established observability-led service assurance practices by tracking performance trends, failure signals, and VoC data to proactively identify risks and drive remediation before customer impact, reducing TAT by 15-20%.
- Built and maintained an operational resilience model for platform operations, reducing first-contact resolution gaps by 8-15% through structured root cause analysis and preventive governance.
- Developed in-depth, hands-on expertise in customer transaction approval rates, diagnosing decline patterns and working directly with cardholders and merchants on root-cause resolution, directly increasing approval rates and revenue for key enterprise accounts.
- As an AI enthusiast, I actively design and use AI-powered tools and automation in daily workflows from operational signal analysis to service delivery optimisation and have built several AI-assisted processes that measurably improved team efficiency and accelerated decision-making in live service environments.

Program Governance, PMO & Portfolio Management

- Joined as one of the first two team members of a newly formed function; built the entire service delivery operating model from zero, defining PMO practices, RAID management protocols, executive reporting cadences, and cross-functional governance frameworks.
- Mentored and developed three team members into the program governance model, scaling portfolio management capacity to serve 80 white-label enterprise accounts across APAC, NA, and EU with full benefits realization tracking against each account.
- Led end-to-end program execution across Product, Engineering, PMM, Client Success, and Communications, driving change management for new launches, operating model shifts, and platform transitions with ~95% on-time delivery.
- Delivered structured executive reporting and stakeholder governance updates to senior leadership, translating operational performance data, portfolio health, and RAID logs into actionable insights and strategic decisions.

Strategic Account Management, Customer Retention & Revenue Protection

- Personally own and manage 30 to 40 high-revenue white-label accounts among Mastercard CORE Payments' top strategic accounts in AP, NA, and EU, with full accountability for customer retention, revenue protection, and renewal management.
- Drove customer advocacy by translating VoC signals and usage data into product and service improvement priorities, delivering 90–93% CSAT and building long-term trust with enterprise accounts at a global scale.
- Built a low-touch, scalable account management model for top 50 customers, reducing manual effort by 15–25% while protecting service quality and supporting OPEX-controlled growth.
- Scaled a premium managed services offering across APAC and NA for six strategic enterprise clients, driving \$1.2M in annual revenue through structured renewal management and proactive customer success practices.
- Led EEMEA regional expansion, onboarding complex enterprise partners and driving measurable post-activation volume growth, strengthening the regional portfolio and supporting revenue diversification.

Digital Transformation & Platform Operations

- Drove digital transformation of support and self-serve operations, improving documentation standards, in-product support readiness, and scalable content delivery, reducing live interaction dependency by 15–25% and improving platform-level resolution efficiency.
- Partnered with Product, Engineering, and Strategy & Ops to convert operational insights into platform tooling and workflow improvements, delivering 10–15% gains in enterprise operations efficiency and measurable uplift in customer experience.

Indian Army (Corps of Signals)

Major / Senior Manager – Service Delivery & Operational Management | Multiple Postings, India | 2013 – 2023

Domain: Telecom Infrastructure | Vendors: BSNL, Airtel, Defence Vendors | Teams: 100+ Personnel

Enterprise Operations, SRE Governance & Service Assurance

- Owned large-scale IT service delivery and SRE governance across distributed, mission-critical enterprise environments, sustaining ~98–99% platform availability and improving operational resilience and delivery consistency by 15–20%.
- Standardised platform operations through documented, repeatable workflows and service assurance frameworks, reducing dependency on individual expertise and enabling scalable, audit-ready operations at command level.
- Drove cross-functional delivery of complex digital transformation and automation programs, achieving ~95% on-time execution and stable post-launch operations through structured PMO governance.
- Led large, cross-functional technical teams and vendor-led operations end-to-end, owning people, assets, and migration delivery, achieving 90–95% on-time delivery and 10–15% efficiency gains across the portfolio.
- Awarded GOC-in-C Commendation Card (2019) for leading the transition to digitally enabled, paperless operational workflows at command level, improving coordination, reducing execution latency, and ensuring consistent service delivery.

ACADEMIC CREDENTIALS

- Diploma in Defence Management & Strategic Studies | University of Madras, Chennai | 2013
- B.Tech – Electronics & Communication Engineering | Punjab Technical University | 2011

CERTIFICATIONS

- Lean Six Sigma Black Belt | ISEL Global | 2023
